

## Covid-19 update

To ensure we operate safely for everyone it has been necessary to make some temporary changes to how we do things at the cattery.

We currently require arrival and collection handover to take place just outside the cattery reception and a safe procedure is in place to do this.

Please do not bring any bedding, toys, or items from home. Comfortable, cosy bedding and appropriate toys are provided for your cat as always. When safe to do so your cat will be very welcome to bring their own bits and bobs from home once again. Prescription food and medication are accepted.

We apologise that we are unable to offer viewings of the cattery during this time. This is something we would normally encourage and as soon as it is safe to do so viewings will resume. Additional information and photographs can be provided on request.

Everything remains the same for your cat when they come to stay with us. They will continue to enjoy comfortable and cosy surroundings with the usual high standard of care and attention. Updates continue to be offered should you wish to know how your cat is getting on while you are away.

We are happy to discuss any questions or concerns you may have regarding the above information.

Thank you for your understanding and helping us to operate safely.
